Concept to Reality Burgundy + Chartreuse Ceremony Design Edition

Production sourcing and feasibility dossier

Southern California sourcing edition - September 2026

Ceremony Design At A Glance

A coastal ceremony direction built from oxblood burgundy, acidic chartreuse, warm ivory, soft stone, candlelight and coastal sunset. The architecture stays visible. Color, floral gesture, seating and scenic form carry the mood without turning the event into decoration.

Element	Execution Route	Planning Note
Burgundy ceremony chairs	Rental, upholstery or silhouette reference	Preserve the low, upholstered visual weight.
White ceremony plinths	Event rental	Use varied heights around the ceremony focal point.
Ceremony candles / hurricanes	Rental or retail	Cluster along aisle and focal zone only.
Chartreuse + burgundy florals	Floral production	Keep color concentrated and architectural.
Burgundy sculptural wall	Custom scenic fabrication	Requires venue-specific sizing, ballast and wind review.

Ceremony Reality Check

Most visible ceremony pieces can be sourced through existing event rental, upholstery or floral channels. The true custom element is the burgundy scenic wall, because its scale, curve, finish and outdoor stability determine whether the concept feels architectural rather than themed.

- Do not purchase 80 retail chairs blindly. Use the chair as a silhouette reference for a rental house or upholsterer.
- Confirm candle policy, open-flame rules, flooring protection and load-in route before final sourcing.
- Treat scenic wall allowances as planning references, not final fabricator quotes.

Verified Sourcing - Ceremony Seating

The closest burgundy chair references should be used to communicate silhouette, depth and upholstered color. For a real event, the stronger route is usually rental-house sourcing, slipcover development or custom upholstery rather than buying retail inventory.

- Target look: burgundy upholstered ceremony seating with sculptural restraint.
- Planning proxy: 80 chairs can move materially depending on rental market, delivery and upholstery route.
- Keep aisle clearances compliant with venue rules and guest accessibility.

Plinths + Ceremony Objects

White cylinder plinths remain relevant because they support the ceremony floral architecture without adding visual noise. Use them near the focal point and aisle threshold rather than as reception props.

- Use three to five heights for depth.
- Keep finishes matte or softly reflective, never glossy plastic.
- Confirm stability, sandbagging and flooring protection for outdoor conditions.

Ceremony Candlelight + Floral Production

Candlelight belongs to the aisle rhythm, plinth clusters and scenic focal zone. Floral production should hold burgundy depth and chartreuse tension in controlled gestures, keeping the stone and negative space visible.

- Dense candle clusters at the aisle and focal point, not table styling.
- Florals: burgundy mass, chartreuse interruption, restrained branch or stem movement.
- Confirm flame rules, LED alternatives and wind shielding with the venue.

06 / CUSTOM SCENIC FABRICATION

Custom Scenic Fabrication

The burgundy sculptural ceremony wall is the core custom element. Suitable routes include scenic flats with bendable plywood, EPS foam with hardcoat, GRG or reinforced gypsum, or a textile skin on a curved frame. Outdoor use requires rear bracing, ballast and venue-specific engineering review.

Route	Use When	Planning Caveat
Scenic frame + flexible skin	Fastest theatrical build	Needs clean finish and bracing.
EPS foam + hardcoat	Organic curve needed	Confirm durability and transport.
GRG / reinforced gypsum	Higher finish quality	Heavier and engineering-sensitive.
Textile skin on frame	Softest interpretation	Less monolithic than plaster-effect scenic.

Production Team / Quote Targets

Send quote requests to scenic fabricators, production rental houses and floral teams with the same concise brief. These are quote targets, not Lia Armonia partners or endorsements unless separately confirmed.

- Send: reference visuals, venue, indoor/outdoor status, desired dimensions, matte burgundy finish and install/strike window.
- Ask for: line-item quote, delivery, labor, ballast, engineering needs, weather policy and revision timeline.
- Confirm: insurance, access, candle rules, floor protection and venue approval process.

Ceremony Budget Architecture

This planning range covers the visible ceremony environment only. It excludes reception, dinner, lounge, bar, catering, photography, planning, entertainment, permits, extraordinary rigging and venue costs.

Ceremony Element	Planning Range
Custom burgundy scenic wall	\$3,500-\$8,000
Stage / steps, if required	\$500-\$1,200
80 burgundy ceremony seats	\$3,600 rental proxy / up to \$12,000 retail proxy
White ceremony plinths	\$300-\$600
Ceremony candles / cylinders	\$450-\$900
Ceremony florals	\$2,500-\$5,000
Ceremony lighting, if required	\$500-\$1,500
Delivery / install / strike	\$1,500-\$3,000
Indicative ceremony environment	\$12,000-\$24,000

Production Handoff

Move from concept to event through a clear sequence: lock the venue requirements, request quotes, approve samples, technicalize dimensions and engineering, install and style the ceremony, then strike and return rentals.

- Lock venue requirements: power, access, candle policy, loading, floor protection and outdoor wind requirements.
- Request quotes: rental houses, florist and scenic fabricators receive the same visual and quantity brief.
- Approve samples: burgundy paint, upholstery direction, candle vessel and floral color before production.
- Technicalize: final scenic dimensions, ballast, stage details and lighting positions become venue-specific.

Source Index + Purchaser Use

Source references are planning resources only. Final pricing, delivery, tax and inventory depend on event date, venue, quantity and vendor availability.

Purchaser use: this dossier may be shared with the purchaser's planner, venue, florist and production vendors solely to execute one private ceremony. It may not be resold, redistributed, republished as a template, or presented as the purchaser's own design work. Design concept, creative direction and production sourcing dossier by Lia Armonia.
